

Pioneers of ground-breaking ink solutions.

World-wide Distribution

Eureka...

Sign-tronic has developed the ultimate, world-class UV ink solution that saves time and money.

With an excellent track record of faultless ink inventions since the late 90's, Sign-Tronic is again providing customers with an unique solution. Now you can have one UV ink that works on any UV printer, whether its Mercury lamp or LED light curing.

Expand your service offering and generate higher profits with new business. No costly investments, just use existing UV printing equipment and reap the rewards.

Sign-tronic's revolutionary P-Inks inks print on incredibly broad range of substrates like wood, self adhesive vinyl, leather, leatherette, PVC banner, paper and even natural untreated/uncoated fabrics/textiles, like silk, cotton and linen.

Unlike traditional Dye-Sublimation printing our range of P_inks offer fantastic outdoor durability with no fading.

Washable and super flexible.

Water and solvent resistant.

Prints edge sharp text and logos with excellent color gamut qualities.

Environmentally friendly with no traditional UV ink smell once cured.

Cost effective "plug and play" conversion from your existing ink configuration.

Saving time and money.
