

## **World-wide Suppliers of Dye Sublimation Ink Solutions**

Meticulous research and development and an in-depth understanding of the large format printing and colour management industries have resulted in SIGN-TRONIC developing a range of performance dye sublimation ink solutions. These ink sets deliver vibrant colours over a wide colour gamut.

## E-SERIES SUBLIMATION INKS

Our new E-Series range of sublimation inks are printer friendly and suitable for use on different textiles for a variety of applications. E-Series inks produce incredible color brilliance, are fast drying and allows for printing on transfer paper as low as only 25gsm, thereby greatly reducing production costs and material waste.

- Wide color gamut with outstanding reproducibility of even Pantone TCX colors.
- Bright, vibrant colors with high optical density.
- Excellent image quality and sharpness.
- Solid blacks resulting in excellent dark images.
- Fast drying time.
- Improved color stability.
- Available in 2l bottles in Cyan, Magenta, Yellow, Black.

Strong, durable packaging with a long shelf life.
